

Ivory Gull *Pagophila eburnea* (0, 2, 0).

(Breeds Svalbard and the high Arctic between Franz Joseph Land and Arctic Canada with small numbers in northern and southeast Greenland).

Published records:

1978

One: First-winter. Bangor Harbour, Bangor, County Down, 26th November to 1st December, photographed (Norman Milligan *et al.*). *Preston* 1979. Photo *Irish Birds* 1: 432. Note change of observer from *Preston* 1979.

1989

One: First-winter. Newforge, River Lagan, Belfast, County Down, 2nd March, photographed (Ron Thompson). *NIBA* 1992.

Following a review by the NIRBC, a 1931 record of an adult at Copeland Islands and Donahgadee, County Down is deemed not proven and is therefore removed from the list.
