

Red-throated Pipit *Anthus cervinus* (0, 0, 1). **RV**

(Breeds north Norway, northern Sweden and northern Finland then east across north Russia to Chukotskiy Peninsula and south to Kamchatka, with small numbers west Alaska. Winters across north and central equatorial Africa, north Indian subcontinent, south China and South East Asia).

Published record:

2001

One: adult in summer plumage. Copeland Bird Observatory, Lighthouse Island, Copeland Islands, 12th April (Neville McKee, P. McKee, S. Goodall). *NIBA* 2003.

Bizarrely they have published the following also "A second bird, probably a first year, was considered by NIBARC to be almost certainly this species". *NIBA* 2003.
